D3 5,000

A dietary supplement to promote the body's absorption of calcium and phosphorous, which are essential for the development and maintenance of healthy teeth and bones.

New research suggests that vitamin D may support immune system function by supporting healthy cell growth.

- Bone Health
- Calcium Balance
- Cardiovascular Function
- Healthy Cell Growth
- Immune System Modulation
- Mood

About Vitamin D

Vitamin D is a fat-soluble vitamin that is essential for maintaining normal calcium metabolism. Vitamin D3 (cholecalciferol) can be synthesized by humans in the skin upon exposure to ultraviolet-B (UVB) radiation from sunlight, or it can be obtained from the diet.

Calcium Balance

Maintenance of serum calcium levels within a narrow range is vital for normal functioning of the nervous system, as well as for bone growth, and maintenance of bone density. Vitamin D is essential for the efficient utilization of calcium by the body.

Cardiovascular Support

Adequate vitamin D levels may be important for maintaining blood pressure within normal ranges. Vitamin D also impacts heart health by supporting the body's natural cytokine production and vascular function.

Cell Differentiation

Cellular proliferation is essential for growth and wound healing. Uncontrolled proliferation of damaged cells is unhealthy. Vitamin D inhibits uncontrolled proliferation and stimulates differentiation, which is the process of specializing cells for specific healthy functions.

Immunity

Vitamin D is an immune system modulator to support healthy T cell and macrophage responses.

SUPPLEMENT FACTS

D3 5,000 Capsules

Available Bottle Sizes: 120

Serving Size: 1 Capsule

Servings Per Container: 120

Vitamin D3 (as cholecalciferol) 125 mcg (5,000 IU)

Other ingredients: Microcrystalline Cellulose, Hypromellose, vegetarian leucine

Suggested use: As a dietary supplement, take 1 tablet daily, or as directed by your health care practitioner.

Caution: Not intended for use in children under 4. Consult your healthcare practitioner if you have any medical conditions, are taking any medications, or are pregnant/lactating before taking this formula. Individuals taking more than 2,000 IU per day should have their vitamin D levels monitored.
